

Policy Wallet

Android Mobile App Development

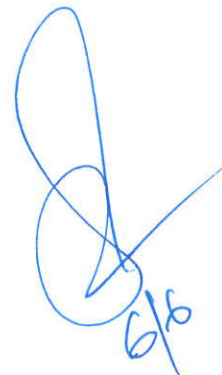

1. Create account using mobile app.
2. Scan document using document scanner.
3. User can convert in pdf or image format.
4. User can upload image from gallery or document folder.
5. After scan document, user can upload document on cloud server.
6. Policy will create in app and status will be unverified.
7. When team member will approve then status will be verified.
8. After verification policy will show with complete data (documents and information).
9. Read SMS & email to show update data status of dues/ renewal / paid

Add family member

1. User can add any number of family member & relatives.
2. User will verify family member using otp on mobile no.
3. User can share policy with family member.
4. Family member should be verified.
5. If family member not verified then user cannot share policy with him/her.
6. Family member can view policy and either of them can make payment also.
7. User can select up to 5 emergency contact numbers.

Web development (Admin panel)

1. Our team will review documents and team member will fill policy and renewal amount & due date information.
2. A record will be created into database.
3. After that team member will approve all the documents.
